Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC §103

The following is a quotation of 35 U.S.C. §103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-⁴/₁ is rejected under 35 U.S.C. §103(a) as being unpatentable over Knight (US 5,779,391) in view of Ohlgart (DT 2541747 A1).

As to Claim 1, Knight discloses an ecological brick (Figs. 1-19A) for slope lands (abstract) comprising a space (40 of Fig. 1) on one side for growing plants, a portion of the space located in the interior of the brick to form a cavity (shown in Fig. 1) to hold the plants. Not disclosed is the brick made from a virgin material that is porous, water permeable, and has retaining properties. Ohlgart, however, discloses a cement (a virgin material) that is porous ("pores" of abstract in English), water permeable ("water-permeable" of abstract in English), and has retaining properties ("water retention" of abstract in English). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the brick of Knight by making it of the cement of Ohlgart so as to use the brick for underwater purposes such as coastal structures (abstract in English).

As to Claim 2, Knight as modified by Ohlgart further disclose a means for coupling (25, 26, 27, and 29 of Fig. 1 of Knight).

Art Unit: 3643

As to Claim 3, Knight as modified by Ohlgart further disclose a plurality of though holes (25,26,27 of Figs. 1 and 2).

As to Claim 4, Knight as modified by Ohlgart further disclose a plurality of cavities (25,26, and 27 of Fig. 1).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schwartz disclose in the prior art a brick with through holes and insert pins. JP11-158838 and JP11-21897 disclose in the prior art various porous bricks.
